5	19.0442	50.0647	
6	21.0122	19.0442	Containers in the side part of the building
7	50.0647	49.8225	Drive over uneven terrain, proceed with caution
8	15.5062	21.0122	

Who is BINNAVI for?

Are there times in your team when a substitute driver doesn't know the route, a new employee needs to be onboarded, or a driver is unfamiliar with the region? You've found the solution – **BINNAVI** comes to the rescue!

Experienced drivers can record their routes as model routes, which then serve as guides for others, allowing drivers to follow the path confidently and efficiently like driving “**on rails.**”

The app has been designed with simplicity in mind so that any employee can quickly and intuitively learn how to use its features without the need for lengthy training.

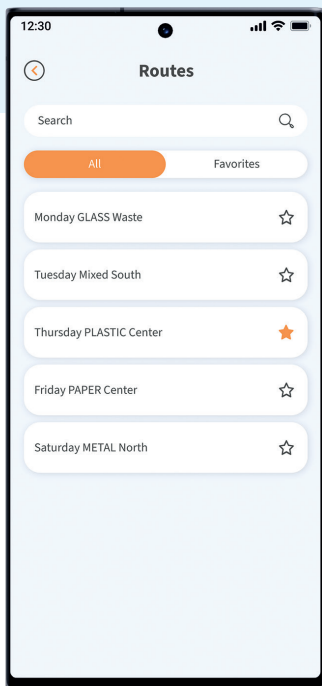

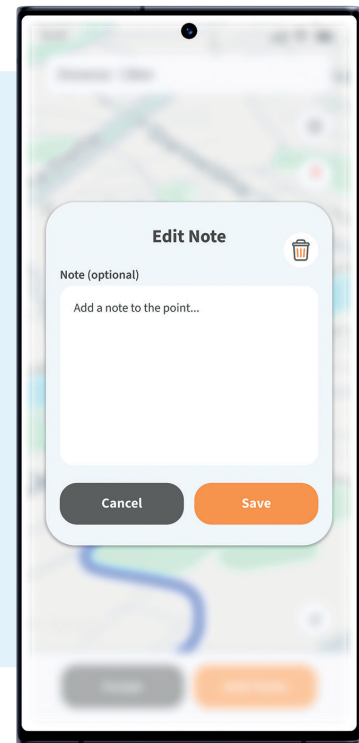

Mobile app features:

The mobile app allows employees to record model routes and add useful notes. Drivers can post comments to provide guidance for other team members.

These notes can include information such as road obstacles, specific waste pick-up points, tips for organizing work on particular route segments, or any other helpful insights.

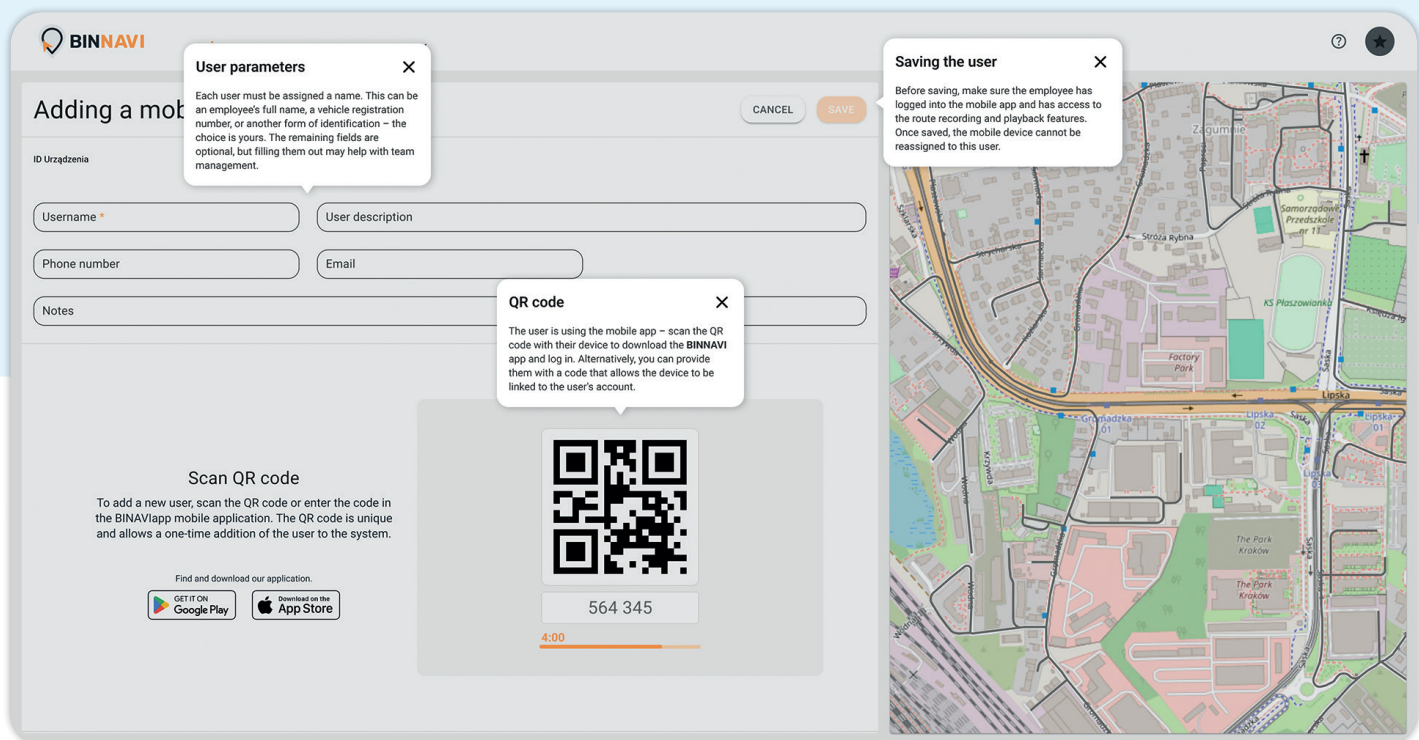

Thanks to the saved model routes, drivers can replay the route step by step, following the predefined path. Additional notes serve as extra support to ensure a smooth and fully informed journey.

How to start using BINNAVI?

To start using the app, just follow a few simple steps:

- Create an account at **www.binnavi.com**.
- Add mobile users – invite drivers to your team.
- Drivers record model routes and enrich them with useful notes.
- Manage routes and assign them to drivers for each working day.

We've prepared some tips to help you out. Just click the question mark icon in the top-right corner of the app to view them on the screen you're currently using. Additionally, video guides are available to show you how to perform basic operations in the app.

Need additional features? Contact us at **info@binnavi.com** and together, we'll find the right solution!
